## **BOOK SYNOPSIS**

Mastering the SAT is a fascinating insiders view of the test makers methods, and strategies to tackle even their toughest questions, from the mind of test preparation expert New Chyten. According to the Boston Globe: "Prepping high scoring essays using Chytens method can be enough to boost scores to heart-thumping numbers." Kristina Rake, of the Rake Group wrote: "I offer Chyten my sincere and fervent congratulations on creating a preparation system like no other I have seen. That is why I am pleased, and not a little surprised, to offer the highest recommendation to Chyten and its SAT Prep Course. It is refreshingly innovative where it should be and perfectly sound and comprehensive where it should be. Parents would be doing their students a disservice by purchasing a book off the shelf...if they study, practice, and employ the methods I learned in this book, they simply cannot fail.
